nutritionDay in Nursing Homes

142 nursing home units participated in nutritionDay 2009. After the 6 months outcome evaluation data clearing and all analysis are done. The final unit reports will be available for download within the next couple of days.

Revised questionnaires for 2009

Due to the experience of the previous years it was decided to revise questionnaires for nutritionDay in hospitals 2010. Sheet 1 and the unit patient list were slightly modified. Sheet 2 was shortened but extended with the question if the patient is terminally ill. The patient sheets 3a and 3b were also shortened and respectively complemented with the question asking the patient to estimate his health situation.

The questionnaires for nutritionDay in ICU and nursing homes will not be changed. We are currently working on the realization of these modifications for all 27 languages. Most of the languages of nutritionDay in hospitals are available at the website already. All other 2010 documents will be available online in time.

Ethics approval

Please clarify if you need the approval of your local ethics committee and make sure to apply in time if necessary.

The approval of the ethics committee of the Medical University of Vienna for next years nutritionDay in Hospitals, Nursing Homes and ICU is available online.

Further approvals can be distributed via this page as well to support your colleagues.
